## Work Experience

### UI Lead | Randstad Digital

August 2024 - Current

Angular, Typescript, Angular Material, Rest API, Azure, Git, Jira, Figma, Miro

*As UI Lead, I guided the development of 3 new applications that would allow college students to apply for financial aid as well as provide a mechanism for 3rd party providers to offer services such as tutoring and therapy*

- Worked with Business Analysts, Scrum Masters, and designers to define requirements of 3 green field applications
- Participated in sprint planning to develop stories and tickets, while working with the backend team to define requirements
- Performed code review sessions and mentored frontend and backend developers on challenges they faced

### UI Lead | Pikmykid

August 2023 - July 2024

Angular, primeNG, Rest API, Azure, Git, Jira

*Spearheaded the upgrade of the customer SaaS application from Angular 1.x to Angular 17 by analyzing the existing application and building a feature parity version both in look and feel as well as functionality*

- Architected and upgraded SaaS app from Angular 1.x to Angular 17
- Educated and worked with the QA team on testing protocols for Angular current

**UI Lead | MHS Global / Fortna****August 2021 - August 2023**

Angular, primeNG, Rest API, graphQL, MQTT, Git, On Prem, Jira

*Working with project managers and stakeholders, led the frontend development of multiple warehouse automation deployments including both brown and green field installations.*

- Manage a team of 10 -12 developers
- Interview and recruitment of new UI developers
- Ran daily dev standup using Jira / Agile
- Project planning with Sales and Project Management teams
- Prepared training documentation for UI positions and administered them
- 1 on 1 and mentoring sessions with UI team
- UI Development in Angular 12 - 15 using graphQL, primeNG, Rest API against a C# .net backend
- Oversaw the architecture of the UI and designed a system to automate the development of angular modules against graphQL endpoints reducing angular time of delivery of new modules from 1 week to 5 minutes

**Decisionlink****March 2019 - July 2021**

*UI Developer Senior Engineer*

- Design of app components and general overall look and feel of the app
- Worked in Figma to convey layout ideas to management, get approval, and develop and implement the design
- Worked with Adobe Photoshop and Illustrator to refine corporate assets for inclusion in the app
- Design and development of the UI for companies main SaaS in Angular 8 and PrimeNG including Bootstrap for the main grid system
- Development, maintenance and cleanup of all HTML pages and CSS
- Development of ROI Calculators incorporating Marketo and Hubspot integrations for our customers.
- Manager of UI team, coordinating with backend team on development of REST API as needed
- Coordinate with customers on delivery of new features and bug fixes
- Primary tools used: Jira, Github, VSCode

**Merchants Mutual Insurance Group****January 2018 - March 2019**

*Application developer*

- Design and development of new website to allow insurance agents to sell contractors insurance to customers using Angular 5 for the frontend, Microsoft TFS for version control and PrimeNG for the frontend CSS framework and components
- Extended PrimeNG components when needed to add additional functionality not provided.
- Worked closely with the end internal user on the best user experience to make the process as easy as possible

**TPW Websites, LLC****December 2014 – May 2017***Systems Engineer*
